

(a) One process, different samples

Data-generating process / population

Class A proportion: $p = 0.40$

● Class A ▲ Other class

Sample 1: $11/20 = 0.55$

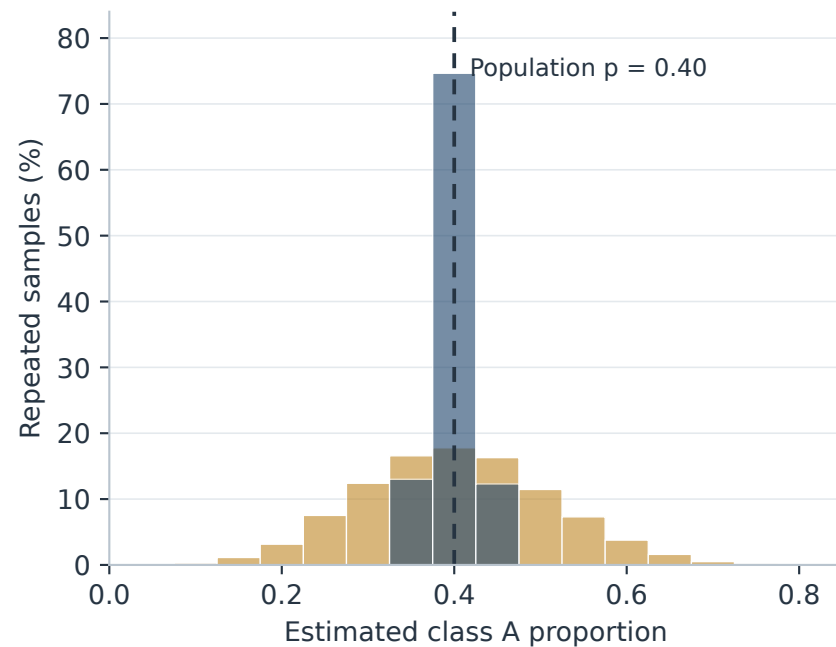

Sample 2: $9/20 = 0.45$

Sample 3: $9/20 = 0.45$

(b) Repeat sampling 10,000 times

■ Small samples: $n = 20$
■ Large samples: $n = 500$
